

# Actai Phone Provisioning

**The Actai Phone Provisioning offers Over-the-Air configuration for WAP, MMS and E-mail-data services according to the standards of the Open mobile Allianz (OMA Provisioning) and Nokia/SE OTA Provisioning.**

## ● Phone Provisioning

- Network Operator
- VMNOs
- Branded Reseller

## ● OTA Configuration for WAP, MMS and E-Mail Services

## ● OMA Provisioning

## ● Nokia/SE OTA

## ● extensive devices support

## ● Permanent Update

## ● Automated customer support system

For mobile user to be able to access and use mobile internet, the mobile phone has to be configured with operator's mobile internet settings. However, configuring handset settings manually is a time consuming and confusing process for the end-user, as a result many go back to operator, VMNOs or reseller to solve the problem. As such high cost of after sales service and hotline supports are incurred.

The Actai Phone Provisioning becomes an indispensable tool for network operator, VMNOs or Branded reseller to provide end users the simple access to mobile data services like WAP, MMS, GPRS, email etc.

The Actai Phone Provisioning is an automated pho-

ne configuration with a comprehensive devices-database of all leading manufacturers. The devices-database is permanently updated and extended by new devices weekly.

The Actai Phone Provisioning can be bound into any WEB sides or IVR systems and is operated by Actai

"White-Labeled", that is under the brand of the respective supplier.

## Lower support costs!

The Actai Phone Provisioning is conceived as a Self-service tool. The screen displayed simple

## 1. Technical Data

- **OMA-WAP-ProvCont-v1\_1-20050428-C**
- **Nokia Over-the-Air SettingsSpecification**
- **Manufacturer: Nokia, Samsung, Siemens, Sony-Eicsson, LG, Sharp, Alcatel, Motorola, Panasonic, Philips, Medion, Sagem, Sanyo, Tevion, u.a.**
- **Data Services: GPRS, CSD, WAP, MMS, E-Mail**

instruction which is easily understood and operated by end user. Simply select the mobile phone model the desired data service and phone number, the configuration data is sent to end-user's mobile phone. The user just need to confirm and save the message(s) and his mobile phone is configured.

A subsequent question catalogue accompanied the customer through the following steps and gives references in problems so that even customers without special mobile phone-knowledge can carry out the necessary configurations themselves.

Such simple processes of Actai Phone Provisioning is the key to reduce tremendous costs in after sales service and hotline support.
